

Marion McKay Coach and Accredited Trainer

Marion McKay is an enthusiastic and personable leader with the dynamic ability to inspire and assist others to achieve their goals. Marion's business objective is to help others reach their full potential, whether working in a group situation or a one to one client relationship, by providing practical skills and leading technology. Marion is adept at articulating the messages that others want or need to hear, at the same time reminding them of their mission and values. All of this she achieves in a supportive and positive atmosphere of respect and cooperation.

Marion works with groups or individuals to develop their communication, thinking, leadership, creative and personal skills drawing on her knowledge and experience gained from over 14 years of experience working in a global corporate environment with Pricewaterhouse Coopers including Human Resources and Counselling.

Marion is a strong advocate of Johann von Goethe's belief... "Whatever you can do or dream you can, begin it..." Her uniqueness comes from her ability to inspire others to develop their potential and to build courage in others to pursue their dreams, whether at a corporate or individual level. She matches this enthusiasm by equipping individuals with the tools and the attitude to succeed.

Through the use of tools such as Mind Mapping® and knowledge of Personality Type from the Myers Briggs Type Indicator, individuals are able to enhance their skills in all aspects of their life. Marion is able to tailor programmes to meet individual or corporate needs to enhance their intellectual capital and leadership capabilities, in particular through the application of the Buzan Principles of Brain Performance, the key skill being "learning how to learn".

Her work in the Effective Communications area, including Family Communications, encompasses practical and transferable skills which are also invaluable in the corporate world. These skills include identifying problem ownership, active listening, conflict resolution and a win/win approach to problem solving.

Marion's passions include developing individuals, working with corporations, educators and communities (whether at a local, national or global level) to facilitate growth ultimately for the benefit of humanity. Marion's energetic and enthusiastic approach is motivated by her goal of making a positive difference to our world. Among those who inspire and drive her business goals are Tony Buzan, his vision for a mentally literate world, and Dr Thomas Gordon's vision for world peace achieved through the use of effective communication skills. Marion is a great believer in the adage "we can make a difference by everything we say and do".
